

# HOW? DOES APS SUPPORT TRAINEES?

---

## APS Supported Programs:

- New Century Scholars Resident Mentoring Program (NCS) - aimed at increasing the diversity of the academic pediatric workforce.
- Pediatric Scientist Development Program (PSDP) - provides intensive training in research relevant to specialty areas of pediatrics. The goal is to prepare entry-level faculty for research careers in academic pediatrics.
- Research in Academic Pediatrics Initiative on Diversity (RAPID) - targets young scholars (residents, fellows, and junior faculty) who identify as underrepresented in medicine (UIM), disabled, or from a socially, culturally, economically, or educationally disadvantaged background.

## Journeys & Frontiers in Pediatric Research

- [APS SPR Journeys](#) program features nine small competitively- selected cohorts guided by leaders drawn from the diverse membership of APS and SPR
- Over 6 sessions, participants hear inspiring stories, receive career development advice and feedback on research, and network with a diverse and inclusive group of peers and experienced leaders in academic science
- Join the closing plenary featuring [Dr. Kevin Churchwell, MD](#) and [Martine Rothblatt, PhD, JD](#), on May 17, during PAS 2021 Phase II. This session is open to all PAS 2021 registered attendees.
