

Lakshmanan Krishnamurti, MD
Professor Pediatrics, Chief Section of Pediatric Hematology/Oncology/BMT
Yale School of Medicine

Dr. Krishnamurti is a pediatric hematologist oncologist of 25 years standing with a primary focus interest in clinical care and clinical and patient reported outcomes research, and clinical trials in sickle cell disease (SCD). He currently serves as Professor Pediatrics, and the Chief of Pediatric Hematology, Oncology and Bone Marrow Transplantation at Yale University Hospital New Haven, CT. Dr. Krishnamurti's research contributions in sickle cell disease span acute and chronic pain, newborn screening, community and international outreach, bone marrow transplantation and gene therapy. His research has been funded by the NIH, CDC, HRSA, PCORI, and several philanthropic foundations. Dr. Krishnamurti is currently PI of the NIH-funded U01 comparing hematopoietic stem cell transplantation to standard of care in young adults with sickle cell disease.
