

Michael J. Rosen, MD, MSCI
Stanford University Endowed Professor for Pediatric IBD and Celiac Disease
Director, Stanford Medicine Children's Health Center for IBD and Celiac Disease
Stanford University School of Medicine

Dr. Rosen is a pediatric gastroenterologist and physician scientist, who has been devoted to inflammatory bowel disease (IBD) research for over 20 years. He joined the faculty of Stanford University in 2021 as the Stanford University Endowed Professor for Pediatric IBD & Celiac Disease and to serve as Director of the Stanford Medicine Children's Health Center for IBD and Celiac Disease. He has expertise crossing mucosal immunology and epithelial biology, formal training and experience in clinical and translational investigation, and direct insight regarding the important clinical challenges caring for children with complicated IBD. His translational research program focuses on how the immune system regulates epithelial function in chronic intestinal inflammation as it relates to IBD. His clinical research program focuses on optimization of anti-TNF therapy in pediatric IBD. Dr. Rosen is Co-PI for the Crohn's & Colitis Foundations Cohort for Pediatric Translational and Clinical Research in IBD (CAPTURE IBD), Chair of the PRO-KIIDS Pediatric IBD clinical research network and serves on the editorial boards of *Inflammatory Bowel Diseases* and *Gastroenterology*.
