

**Eneida A. Mendonca, MD, PhD, FAAP, FACMI**

Rieveschl Chair of Biomedical Informatics and  
Director of the Division of Biomedical Informatics  
Cincinnati Children's Medical Hospital  
Professor of Pediatrics and Biomedical Informatics  
University of Cincinnati

Dr. Mendonca is a physician-scientist with a background in pediatric critical care and a specialization in biomedical informatics. Her research focuses on leveraging health information technology to enhance clinical care, address health disparities, and drive translational research. This includes innovative work in electronic health records, clinical predictions, effective phenotype modeling, natural language processing, and maternal-infant health data linkage. She is deeply committed to education, having mentored trainees at all levels and several disciplines and contributed to developing curricula and training programs in informatics at multiple institutions. Additionally, she has advanced clinical informatics operations through innovations such as immunization registries and mobile health tools while actively contributing to the scientific community through roles with NIH study sections, the American Medical Informatics Association, the American Academy of Pediatrics, and the National Academy of Medicine.
