

**Beth A. Tarini, MD, MS, MBA**

Co-Director, Center for Translational Research | Children's National Research Institute |  
Children's National Hospital  
Richard and Agnes Hudson Endowed Chair in Pediatrics  
Director of Resident Research | Children's National Hospital  
Professor of Pediatrics (with Tenure) | The George Washington University

Dr. Beth Tarini is the Richard L. and Agnes F. Hudson Chair in Health Services Research and Professor of Pediatrics with Tenure at George Washington University and Children's National Hospital. She holds several leadership roles at her current institution, including Co-Director of the Center for Translational Research, Director of Resident Research at Children's National, and Director of Academic Development at the Goldberg Center for Community Pediatric Health. Dr. Tarini's clinical and research interests focused on genetic testing in pediatric care, including delivery of care following positive newborn screenings, have distinguished her as a nationally recognized leader and scholar.

Throughout her career, Dr. Tarini has been strongly committed to supporting and growing the child health research workforce. She also has served as the primary research mentor for many clinical fellows, including several individuals who identify as underrepresented in medicine. During her time as President of the Society for Pediatric Research, just one of her significant leadership roles, Dr. Tarini helped implement the PROSPER Award (Promotion of Fellows' Pediatric Research Diversity Award), demonstrating her commitment to DEI efforts.
